The screenshot shows the WordPress 'Import Snippets' page. The left sidebar contains navigation links: Dashboard, Posts, Media, Pages, Comments, Appearance, Plugins, Snippets (highlighted), All Snippets, Add New, Import, Settings, Users, Tools, and Settings. The main content area is titled 'Import Snippets' and features a success message: 'Successfully imported 13 snippets. [Have fun!](#)'. Below this, instructions state: 'Upload one or more Code Snippets export files and the snippets will be imported. Afterwards, you will need to visit the [All Snippets](#) page to activate the imported snippets.' The 'Duplicate Snippets' section asks 'What should happen if an existing snippet is found with an identical name to an imported snippet?' and offers three radio button options: 'Ignore any duplicate snippets: import all snippets from the file regardless and leave all existing snippets unchanged.', 'Replace any existing snippets with a newly imported snippet of the same name.' (which is selected), and 'Do not import any duplicate snippets; leave all existing snippets unchanged.' The 'Upload Files' section instructs to 'Choose one or more Code Snippets (.xml or .json) files to upload, then click "Upload files and import".' It shows a file selection area with the text 'Choose files from your computer: (Maximum size: 128 MB) | Choose Files | encode-email-s...-snippets.xml' and a blue 'Upload files and import' button. At the bottom left, it says 'Thank you for creating with [WordPress](#).' and at the bottom right, it says 'Version 4.9.8'.
